What a Home

Four Bedrooms three baths over 2300 sqft and on a large country lot on a country lane in beautiful Sonoma Valley with view of the hills and a vineyard across the street. This home would be great for that extended family that wants their own area. The down stairs has a family room, bathroom, and kitchen with access to the back patio and the upstairs has three bedrooms and two baths and kitchen with views and your own private deck. This home would make a great day care center.
